Wooden house

*“ What a better way
to welcome Unique as you want to be”*

A traditional **Joglo House** is javanese architecture.

It has four main big pillars in the center and high rounded ceiling with ornaments contains javanese phylosophycal teachings. Philosophycally's means: welfare, happines, peace and eternity.

The Joglo's which is original from villagers, applies wood solid wall and recycled wood. While this building applies a brick wall on certain part and woodcarving ornaments.

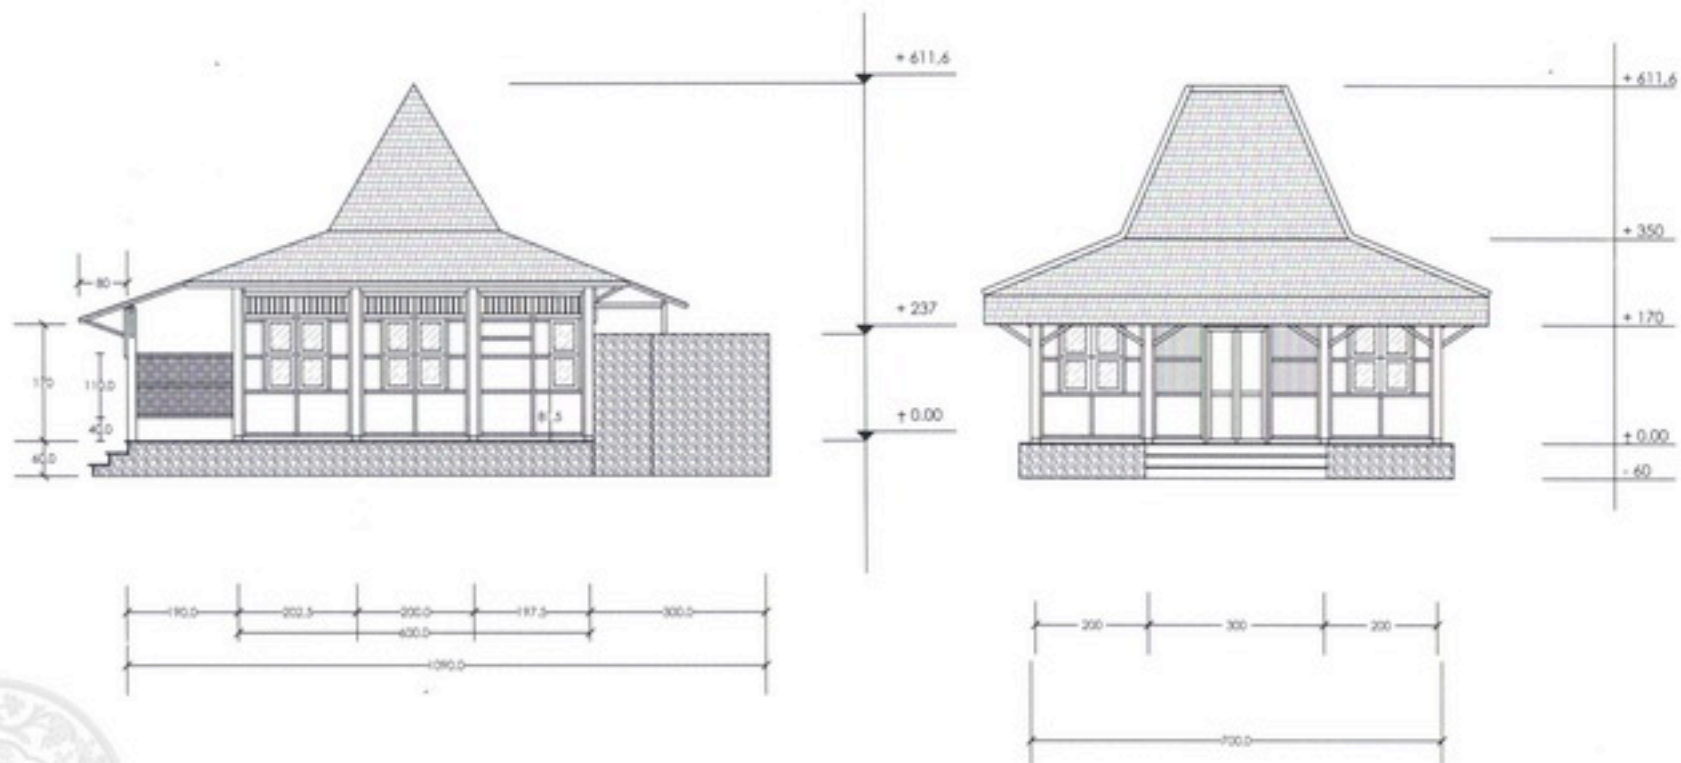

The joglo building lays in settled condition of proportional form, construction systems of stable wood and depth space can be applied kind of function.

In the other condition, the Joglo can be collaboration with others, like minimalist house or contemporary. When this building has been collaboration, this is remain to be well established at its form typical and increasingly give positive energy at overall of the building.
